## Royal Couple Confer With Premier Manning

The Royal Couple, shown in the Legis. Gov. Chambers at the Legislative Building with Premier E. C. Manning, examining a photo of the first Royal Train which travelled across Canada in 1898 with the Duke of Connaught.

## BRIDE HONORED AT SHOWER HELD IN HEDLEY'S HALL

A large number of friends gathered in Hedley's Hall on Monday evening October 29 for a bountiful miscellaneous shower in honor of Miss Marjorie Chase, a bride of this week.

A lovely model farm centred the hall. So perfectly was everything arranged. There was real ivy growing up the wall of the farm house.

The program began with community singing and when the bride-to-be entered with her mother everyone sang "For She's a Jolly Good Fellow." This was followed by a piano solo by Della Symington; a recipe on "How to Preserve a Husband" by Mrs. Gunn and a song in honor of Marjorie written by Mrs. Hurst. Misses Maureen Dempsey and Alice Tomlinson then conducted an interesting contest and Gary Hubman and Alan Symington sang a duet.

A wonderful array of useful and beautiful shower gifts were then presented to the guest of honor by Ronnie Dempsey, Alan Halvorsen, Sharon Gunn, Cheryl Halvorsen, Maureen Gunn and Paddy Hubman who were all attired in overalls and straw hats and carried their precious burdens in milk pails and egg baskets. As they marched around the hall Gary Hubman and Alan Symington sang "Mike O'Casey had a Farm."

Maureen Dempsey and Alice Tomlinson were invited to assist the bride-to-be with the pleasant task of unwrapping the gifts. When this was accomplished and the various contents admired by all, Marjorie warmly expressed her thanks. A delicious lunch brought this happy occasion to a close.

Hostesses were Miss Marion Long, Mrs. Hubman, Mrs. Gunn, Mrs. A. Halvorsen, Mrs. Whidden, Mrs. Dempsey, Mrs. Tomlinson, Mrs. Milne, Mrs. Hurst and Mrs. Symington.

## Northern Nuggets

The date for the Buffalo Coule W.I. tea and bazaar is Saturday, November 17. Come for a delicious lunch and a grand display of home sewing.

Mr. and Mrs. Allan Larson, Mr. and Mrs. Dick McRoberts, Mr. and Mrs. Edgar Jones, Enid Jones and Mrs. Archie Cook travelled to Edmonton to see the Royal Couple.

Mr. Keith Coffin has gone to Calgary to attend the winter session at the Technical school.

## NOTICE

A meeting in the school lunch room will be held November 9 at 4 p.m. to discuss continuance of hot lunch programs for the school children. All interested parents are asked to attend.

## NOTICE

A meeting in the school lunch room will be held November 9 at 4 p.m. to discuss continuance of hot lunch programs for the school children. All interested parents are asked to attend.

## Dine With Royal Party

## ARMISTICE SERVICE IN KIEFER'S HALL NOVEMBER 12, 10:45 a.m.

Irma had its share of honors when the Royal visitors came to Edmonton. Mr. Masson, MLA, and his wife were among those who met and dined with their Royal Highnesses at the Macdonald hotel on Saturday night. This was an informal dinner and both Princess Elizabeth and Prince Philip were so friendly and natural in manner that those present were made to feel that dining with royalty was the simplest thing in the world.

We asked Mrs. Masson what the Princess wore and she described a simple black dinner dress with lace bodice and full skirt with something in the folds that glimmered as she walked.

Both Mr. and Mrs. Masson feel that the visitors were all and more than the description we hear by press and radio. And this will give the Massons another cherished memory to keep with memories they already had of meeting and dining with the King and Queen in 1939.

## Glen-Coa Gleanings

We are sorry to report that Mrs. Fred Knudson is a patient in the Hardisty hospital. Mrs. A. Lindquist spent a few days around here visiting friends this past week.

Sigurd Fluveog and Lloyd Erickson accompanied by Mrs. H. Stakkeland of Mt. Vernon, Wash., motored from the coast last week to attend the wedding of Miss Lilly Nelson and Mr. Ralph Erickson. Their stay was very brief, just over the week-end.

Some of the neighbors drove to Edmonton last Saturday and managed to get a very good look at the Prince and Princess. As far as we know the lucky ones were Mr. and Mrs. M. Reitan, Mr. and Mrs. J. Halvorsen, Mr. and Mrs. Berge Gulbrans and children and Bessie Pedel.

Mr. and Mrs. Curtis Satre of Saskatoon were week-end visitors here.

Sharon Ladies Aid will be held on Thursday, November 8 at the home of Mrs. L. Satre.

On Saturday afternoon Nov. 3 many Sharon folk will be motorizing to Loughheed to take in the sacred concert of the Male Chorus of Luther Seminary of Saskatoon. This concert is to be at 4 p.m. and it will be well worth making an effort to attend.

## Rev. & Mrs. Saugen Honored

Rev. I. J. Saugen

(From The Viking News)

Following the regular Sunday evening worship at the Great Valley Lutheran Church last Sunday evening, a surprise gathering was held by members of the congregation in honor of Rev. and Mrs. I. J. Saugen who are leaving this week for New Westminster, B.C. where pastor Saugen has accepted a pastorate.

After lunch a presentation was made of a purse to Rev. and Mrs. Saugen, Chairman of the gathering was Mr. Alfred Nordstrom. Speaking on behalf of the congregation were Mr. S. Hafso and Mrs. George Walker. Both Rev. and Mrs. Saugen were held in high esteem by the people of the congregation and the community in general. The best wishes of all go with them in their new field.

The local congregation has called pastor John Precht of Torquay, Sask. who will be here shortly to fill the vacancy left by Rev. Saugen.

## B.F.B.S. Films Enjoyed

Those who attended the showing of the British and Foreign Bible Society films at the Alliance Tabernacle on Monday last were amazed at the work done by that well known organization.

The first film called "The House of the Book" showed the Bible House in London. This film showed how Bibles are printed and made and also gave some staggering facts and figures about the demands made on the Bible Society.

The second film was "The Frontiersman." A technicolor picture made by Mr. Heuer himself and awarded a prize by the National Film Board as the best film made by an amateur.

Canvassers were organized at this meeting and on Monday next ladies from the United Church, the Alliance Tabernacle and the Anglican church will canvass the village of Irma in the interests of the Bible Society.

The Bible Society needs our support because its chief motive is to put as many copies of the scriptures as possible into the hands of people everywhere. Very often these Bibles are given free. In any case not more than 40 per cent of the costs of publishing are met by the sale of Bibles. Therefore, the B.F.B.S. is calling on Christians everywhere to render financial aid in this important work.

## Wedding Bells

ERICKSON — NILSON

On October 26 at 3 p.m. Sharon Lutheran Church was the setting for a very pretty wedding when Lilly Solveig Nilson, only daughter of Mr. and Mrs. Silvert Nilson, became the bride of Edwin Ralph Erickson, second son of Mr. E. R. Erickson and the late Mrs. Erickson, all of Irma.

The double ring ceremony was performed by the Rev. I. J. Saugen before an altar graced with pink and white carnations.

Given in marriage by her father the bride wore a floor length white satin gown with lily point sleeves, fitted bodice, net yoke and net over-skirt appliqued with satin flowers. Her full length veil of fine net was held in place by a pearl coronet. She carried a bouquet of red roses and white baby mums. Her only jewelry was a three-strand necklace of pearls, gift of the groom.

Miss Evelyn Erickson, sister of the groom was maid of honor, wearing a yellow floor length gown of brocade taffeta with an over-skirt of net.

Miss Margit Jensen as bridesmaid chose a dress of mauve bengaline with net yoke and pleum. Both attendants wore matching chapel veils and lace gloves and carried bouquets of yellow baby mums.

The twin flower girls, Esther and Evelyn Fluveog wore identical dresses of pink taffeta and carried petite colonial bouquets.

The groomsmen were Johnny Erickson and Oren Spring. Erling Nilson and Gordon Hollinger ushered the guests. Guest pews were marked with streamers of white, yellow, mauve and pink. The wedding music was played by Mrs. B. Evans of Irma, and soloist was Asieva Stenberg.

Mr. Gordon Fenton had the misfortune to have a board from a granary fall and cut a gash in his forehead which needed several stitches to close.

Mr. and Mrs. R. Dempsey and Maureen motored to Edmonton last week. They were accompanied by Mr. and Mrs. Bert Armitage.

Mr. and Mrs. Clarence Barber motored to Edmonton on Saturday. Mrs. R. Dempsey and Ronald accompanied them. They report good views of the Royal Couple.

Mr. Robert Dempsey with Messrs. C. Barber, A. Firkus, S. Knowles and Harry Long attended the sale of purebred and grade cattle at Lloydminster last Friday.

Miss Betty Armitage and Miss Maureen Dempsey went by bus to Edmonton to see the Royal Couple.

## Easterly Echoes

Mr. and Mrs. Oscar Steffensen wish to announce the engagement of their eldest daughter, Solveig Marie to Ole Martin Haasok of Petsund, par Oslo, Norway. The wedding will take place at Sharon Lutheran Church, November 12 at 2:30 p.m.

## ANNOUNCE ENGAGEMENT

Mr. and Mrs. Oscar Steffensen wish to announce the engagement of their eldest daughter, Solveig Marie to Ole Martin Haasok of Petsund, par Oslo, Norway. The wedding will take place at Sharon Lutheran Church, November 12 at 2:30 p.m.

Mr. and Mrs. C. Barber, A. Firkus, S. Knowles and Harry Long attended the sale of purebred and grade cattle at Lloydminster last Friday.

## A Prison Reform

MUCH THOUGHT HAS BEEN GIVEN in recent years to methods of dealing with criminals and of conducting penal institutions. Modern prisons differ greatly from those of earlier times and there is a growing tendency to better living conditions in prisons and to help prisoners towards rehabilitation while they are serving terms in penitentiary. It has recently been announced by Joseph McCullay, Deputy Commissioner of Penitentiaries, that nearly 2,000 inmates of penitentiaries in Canada are now taking correspondence courses in educational subjects. This is part of the programme which has been undertaken to help prisoners to fit themselves for useful work when they return to the outside world.

**Proved Plan Is Worthwhile** Results of permitting prisoners to take correspondence courses have proved that the plan is well worthwhile. A recent survey taken of prisoners at Collins Bay penitentiary, Kingston, Ontario, showed that nearly eighty per cent. of those taking courses in vocational education did not revert to crime after leaving prison. In many cases criminals are men who have not been trained to make their living honestly, or who have been in work for which they were not suited. Trained for useful work, and for skills fitted to their abilities, many are happy and successful after receiving vocational instruction while serving terms in penitentiary.

**Meeting With Good Results** Mr. McCullay drew attention in his report to the fact that restriction of personal liberty was the greatest punishment suffered by prisoners, and that proper treatment during their time in penitentiary could result in them going out as better and more useful citizens. This new policy of putting emphasis on the rehabilitation of prisoners is meeting with excellent results, Mr. McCullay said. For many years there has been interest in all parts of Canada in improving conditions in prisons and it is encouraging to know that progress is being made in dealing with this important social problem.

## No Water Loss To Manitoba In River Project

OTTAWA.—Manitoba need not worry about any water loss through the operation of the South Saskatchewan river project, G. M. Ferrie (L-Mackenzie) told the commons.

Speaking in the throne speech before the opening of the legislative session project at Frog Narrows on the Churchill river could control the waters as far as Lake Winnipeg during high water at Frog Narrows. The Churchill flows down into the Saskatchewan.

Extension of the Sherridon-Lynn Lake railroad right through the north to Reindeer Lake, Lake Athabasca and Uranium City in Northern Saskatchewan, and thence to Fort Smith and on to Prince George, B.C., was advocated by Mr. Ferrie. He also suggested construction of a defence highway from Edmonton to Winnipeg.

The MacKenzie member asked that the government spare no expense in trying to defeat the new threat of rust in western Manitoba and eastern Saskatchewan.

## Expect 7,500 Farms Wired This Year

REGINA.—The Saskatchewan Power Corporation said it expected 7,500 farm homes would be wired for rural electrification by the end of the year.

The total indicated that about 3,000 houses had been wired already this year.

The power corporation said the general construction program was ahead of last year's, with 94 miles of line completed. About 85 miles had been finished at this time last year.

## GOLDEN PRAIRIE A GOOSE-HUNTERS PARADISE

GOLDEN PRAIRIE, Sask.—The district around Golden Prairie is a goose-hunters paradise so it seems.

Recently a nine-man hunting party bagged 43 of the big honkers, one of which weighed 12 pounds.

They aren't even wild, hunters report. The geese have been seen feeding in fields close to the roads and the passing traffic bothers them very little.

### PLENTY OF DEER

FORT FRANCIS, Ont.—Prediction that deer herds will increase again in a few years was made by R. C. Purdon, Ontario Government biologist who conducted a wide survey of this area.

## Funny and Otherwise

One sweet thing to another: "I like men who make things." Like Mr. Potter. He made \$50,000 last year."

Doctor: "Now, take deep breath and say nine, three times."

Willie (after inhaling): "Twenty-seven."

A restaurant keeper noticed that some of his customers annexed the current day's paper for an irritating long time. He hit on this little piece of sarcasm.

Prominently displayed on the walls was the announcement: Those learning to read are requested to use yesterday's papers."

Finding she tired quickly, a woman decided to weigh herself. As she stepped off the scales, her husband eyed her appraisingly and asked: "Well, what's the verdict? A little overweight?"

"Not you," said his wife. "But according to that height table on the scales I should be about six inches taller!"

A cavalry recruit was at his first riding practice.

"I don't like the look of this horse's head," he complained.

"Don't worry, you'll soon get over that," his instructor replied.

Marriage is a mutual partnership: The husband is the mute.

"That quack who cured me wants a testimonial. What can I say?"

"Just say: 'He is an unqualified success'."

Cavalry recruit was at his first riding practice.

"I don't like the look of this horse's head," he complained.

"Don't worry, you'll soon get over that," his instructor replied.

Concerned about his husband in the Navy, a wife sent a note to the pastor. It read, "John Anderson having gone to sea, his wife desires the prayers of the congregation for his safety." The minister read aloud: "John Anderson having gone to see his wife, desires the prayers of the congregation for his safety."

The industrialist who eyed his wife over the dinner table in surprise and remarked: "That's a beautiful necklace you're wearing, my dear."

"Yes, isn't it darling," answered his wife. "I found it in the back seat of your car."

Some cause happiness wherever they go, others whenever they go.

"I see by government statistics," declared Mrs. Buggs, "that one-third of all married women work."

"That means," nodded Mrs. Tuggs, "that the rest of the husbands have to buy their own car."

An elderly woman entered the knitwear department of a busy store and asked for instructions about making a sweater for a dog.

"How big is he?" inquired the assistant, politely.

The woman started to make vague gestures.

"Maybe you'd better bring him in," suggested the girl at length.

"Oh, I can't possibly do that," came the answer. "I want it to be a surprise for him."

Vermont state has more cows than humans. 2007

## ICE ACCIDENT PREVENTION AND RESCUE

This is the time of year that the first ice forms on sloughs, ponds, creeks. Children are anxious to put on their skates and start the skating season. The fun is not without its dangers, as the ice has hardly had time to become thick enough for real safety.

Parents should investigate the skating site by chopping a hole in the ice and measuring the thickness. Two inches is fairly safe for individuals, three inches for small groups.

It would be wise for an adult to go with the children. The supervisor should take along a length of rope and a long pole. Save the time though occur, rescue attempts can then be started without delay.

The victim should support himself by spreading his arms on the ice surface. Rescuers should lie down so as to spread their weight when squirming their way

toward the victim until he can be reached with the pole or rope. The rope should have a small loop at one end so the victim can slip his hands through for a secure grip.

If ice crossings must be made it is wise to carry a long pole which will support the bearers weight across the hole, should the person break through. Avoid skating or walking on ice alone. Let your friends know where you will likely need help. Ice that borders open water is usually quite thin, such as might be found on running streams.

Springs are frequently found in large bodies of water and the spring water often creates thin spots in what appears to be quite thick ice. If a person falls through, one is wise to keep close to shore where they may be reached quickly provided of course that there is someone present who is equipped and capable of performing a rescue.

## Thousands Of Trees Given To Sask. Schools

REGINA.—Many of the young trees resting for the winter on Saskatchewan school grounds came from forest nursery station at Indian Head.

Last year more than 30,000 young trees were sent free of charge to schools from the station for the conservation and beautification of school grounds.

The station supplies certain trees and shrubs free to any school in the province, in competition with the provincial departments of education.

Trees and shrubs available for school use are maple, ash, northwest poplar, Russian poplar, leaf willow, laurel willow, cottonwood, caragana and elm.

"Evergreens are not on the free list," L. F. Titus, chief superintendent of schools, said. "But these may be obtained at a small charge if purchases are made directly to the station."

Flowering shrubs are not available.

Schools wishing trees apply to either the department of education or nursery station.

A federal government conservation project, the Indian Head nursery also supplies trees for Manitoba schools.

## LARGER AREA

Vancouver Island has an area of about 12,400 square miles, compared with 2,184 square miles for Prince Edward Island.

## THE TILLERS

## PEGGY

## Old Custom Says Prince Philip Responsible For Indian Family

REGINA, Sask.—Prince Philip does not know this yet, but he might as well learn the worst. From now on he is responsible for the children of Mrs. Joe Bear, Indian squaw of the Metis Tribe near Stony Rapids, in north Saskatchewan.

There is nothing personal about this. It just happens that Mrs. Joe Bear made moccasins that were presented to Prince Charles and Princess Anne.

That is where the Prince gets hooked for Indian tribe custom lays it down that any man who accepts a moccasin from an Indian woman thereafter accepts responsibility for her children, past, present, and future.

That's only half the story. Never before were moccasins the occasion of such a hunt. Not until recently did the Saskatchewan Government know it would be prudent to present the Prince with gifts.

When they did find out, they decided to give a unique gift of real Indian moccasins—and none of your store variety. But making moccasins in the old decorated Indian style is almost a lost art. So the word went out to Saskatchewan Indians to make officials in the north:

"Two pairs of the best moccasins you can find. Sizes for boy approaching three and girl of one year old."

All over the northland Indians suddenly decided the white man was going crazy. Plans on patrol and other services, including the skies on lonely lakes and air strips near Indian villages

with no other request than for two pair of moccasins.

At last they were found, and down to Prince Albert, where a government official discovered they were not exactly the right size.

So another cry went out—for an Indian woman skilled in her art, who could alter them.

It was a close call, but the moccasins, suitably altered, got into Regina on time and were presented to the Royal Couple at the Legislative Building reception.

And that's the end of the story—except to remind Prince Philip that old Indian custom.

## WHEAT BEING SHIPPED TO PRINCE RUPERT ELEVATOR

PRINCE RUPERT, B.C.—Firs when to mind in Prince Ruperto in a decade has started rolling into the dominion government's 1,250,000-bushel grain elevator here.

Deliveries are expected to be at the rate of about 100 carloads a week. About 600 carloads will fill the elevator.

A magnetic day is 23 hours and 58 minutes.

## Luscious HONEY BUN RING

### Quick to make with the new Fast DRY Yeast

Scald  $\frac{3}{4}$  c. milk,  $\frac{1}{2}$  c. granulated sugar,  $\frac{1}{2}$  tbsps. salt and  $\frac{1}{4}$  c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl  $\frac{3}{4}$  c. lukewarm water, 1 tsp. granulated sugar, stir until yeast is dissolved. Sprinkle with envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 mins. Then stir well.

Add cooled milk mixture and stir in 1 well-beaten egg and 1 tsp. grated lemon rind. Stir in 4 c. once-sifted bread flour; beat until smooth. Work in 2 c. (about)

once-sifted flour board until smooth and elastic. Place in greased bowl and grease top with chopped walnuts.

## Harvard Professor Claims Comets Are Just Chunks Of Ice

Course And Speed Of Astral Bodies Determined By Gases, Says Astronomer

CAMBRIDGE, Mass.—A Harvard astronomer's curiosity about two celestial mysteries—(a) the case of the hurrying comet and (b) the case of the tardy comet—has led him to conclude comets aren't very big and are made largely of ice. Fred L. Whipple, Harvard professor of astronomy, reported in an interview that the speed-up or the slow-down can be attributed to gas jet-propulsion, or to gas jet-braking.

Here's how he worked it out. He constructed in theory a "comet-meteor" model. This model is a gravel-like mixture of meteoric matter, fine dust and molecules combined with a large amount of ice. These ices, which may make up two-thirds of the comet's head, are really very cold, solidified gases.

Here's how the comet slows down, or speeds up. Comets have egg-shaped orbits. The sun is at one end. Near the sun, the warm rays turn some of the ices to gas. The expanding gas departs at great speed. As it leaves, it delivers a push.

Which direction the gases push the comet would depend on the direction

in which the comet's head rotates. One way, the push would speed the comet up; the other way it would slow it down.

The researchers of Prof. Whipple and colleagues seem to have whittled the comets down to size from the faraway things that used to reign in the outer universes. The diameter of Halley's Comet has variously measured up to 315,000 miles. But recent computations place the actual diameter of the head at about only 15 miles! Encke's Comet now has a head shrunken to about a mile in diameter.

Where do comets come from? Dr. Whipple leans to the theory that they coalesced and their gases condensed in great, cold quiescent dust clouds at vast distance from the center of the solar system.

Comets don't live long compared with planets and asteroids. Short-period comets may last 3,000 to 60,000 years, bigger ones last longer. Some comets apparently are split up when they hit asteroids, little rocky planets. Meteor streams float in orbits through the solar system—apparent remnants of comets long since vanished.

### Not Much Room Under Car Hood

SHREVEPORT, La.—There isn't much room under an auto hood. Just ask Kenneth Causey who was trapped there for three hours recently.

Causey had parked his car in downtown Shreveport and proceeded to lock the keys inside. Then he crawled under the hood to remove a plate from the dashboard and get the keys. At this point the hood snapped down on the 119-pound Causey.

His calls for help went unanswered.

Finally Causey squeezed his fingers out from the hood and continued to call. Two women passed by. They heard the yell-saw the fingers poking out of the car and ran away screaming.

A man who was passing by stopped and freed him from his cramped quarters. Then the boy held up the hood while Causey reached through and got the keys.

If it happens again," Causey commented, "I'll break the window."

### You Call This Living?

Mother had her numerous offspring out shopping, and as they waited for a bus she began to tell them a story to keep the peace.

"One time I was in the middle of the jungle," she said wistfully, "I looked up to see a tiger only a few feet away. I tried to run, but with a pound it was on me and I was struck down dead."

"But it couldn't have. You're still living," protested several of the children.

A weary glance swept the family as mother closed her eyes and replied, "You call this living?"

In 1968 the Government of New France decided to make a complete record of all the people living in the colony. A census of every person's name, showing his age, where he lived, what he did for a living and whether he was married or single. When it was completed, the information filled 154 pages and it is still kept in its original form in the Archives in Paris, France. A copy may be seen in the Public Archives in Ottawa, Canada's capital city.

When Canada was formed in 1867 it was decided that a census should be taken every 10 years, commencing in 1871. This year, then, modern Canada took a look at itself for the ninth time.

Nineteen thousand people helped take down the names of all Canadians. They didn't use an ordinary pen or pencil but wrote with an "electrographic" pen using a special ink. Their reports were mimeographed and the cards are kept in Ottawa. When a card is put in a machine a hole is punched wherever there is electric writing, and from these hole punches a complete record may be made.

Everyone's name is on file in Ottawa—Canada knows your name.

### Baby Daughter Of C.O. Adopted By N.C.O.'s

WITH CANADIANS IN KOREA, Baby Victoria Patricia Stone has 50 new "fathers"—all in Korea.

The new daughter of Lt. Colonel (B) Edward J. Stone, of Edmonton, officer commanding the 2nd Battalion, Princess Patricia's Canadian Light Infantry, was "adopted" recently by the warrant officers and sergeants of the regiment.

RSM Les Grimes, of Edmonton, acting for the others, presented a baby's silver porridge set to Lieut. Colonel Stone to be sent on to Victoria Patricia's birth home.

In a brief speech he said the battalion had been given two honors: "The unit citation from the President of the United States and the birth of Victoria Patricia."

Born July 25, baby Victoria Patricia was named for the regiment, whose colonel-in-chief is the former Princess Patricia, daughter of the Duke of Connaught, who was Governor-General of Canada when the regiment was formed during World War I. She is now Lady Patricia Ramsay.

The first modern hat for men was made in Paris in 1404 by a Swiss manufacturer.

2054

MISSION OF MERCY—These fifteen sick Eskimos, one a stretcher case, arrived at Montreal Airport recently after a 1,200-mile flight from the Baffin Bay area aboard an R.C.A.F. Dakota aircraft. They were taken to hospital at nearby Caughnawaga for medical treatment for tuberculosis and other ailments.

### Decoratively SPEAKING

(By Francis James)

There are those who claim that unfinished furniture is the finest invention since the telephone. When you consider the groceries of most of it, the fine sturdy structure and the remarkable difference in price between it and similar finished pieces it's an argument that makes a lot of sense.

There's no real difficulty in finishing off this furniture to lovely, gleaming smoothness that will add beauty to your room. But, as in most other things, you have to know the routine in order to achieve the highest success.

Start thoroughly sandpaper all surfaces of the piece with No. 2-d sandpaper. Sand with the grain, as any marks across the grain will show. Dilute white shellac with equal parts of methyl hydrate and brush a full coat on all surfaces. If your piece contains drawers or cupboards, the insides of these should be coated with this texture, too. Let your piece stand for at least 12 hours—and then mix flat white paint with turpentine. Your mixture should be quite thin. Add a little raw umber to break the deadness of the color. Brush a coat of paint quickly over the surfaces of the furniture. If the piece has drawers, remove these and do them one at a time. Then do the top.

Before the paint is completely dry, wash off the excess rags—being sure to move always with the grain—until the grain texture shows through.

Leave the piece to dry—and then apply a final, finishing coat of thin white shellac. When this is dry, apply wax and polish to a dull sheen. This will produce the well known finish of furniture which goes perfectly with modern furnishing schemes. Pastel effects can be just as easily achieved by adding to the white paint instead of raw umber. Allow the piece to stand for at least

12 hours until the shellac is thoroughly dry. Then sandpaper it lightly to make sure that all dust and specks have been removed to leave a clear, smooth surface for the next operation.

Now, mix flat white paint with turpentine. Your mixture should be quite thin. Add a little raw umber to break the deadness of the color. Brush a coat of paint quickly over the surfaces of the furniture. If the piece has drawers, remove these and do them one at a time. Then do the top.

### Fought For Two Years—Now Married

PHILADELPHIA—George R. Conover had an accident—and he got tired telling how it happened.

Ask him about it and you'll get this printed card:

"The patch on my head covers a four-inch scalp wound which took seven stitches to close. It happened on my boat at Ocean City, N.J., while making a motor repair. Large waves threw me off balance and my head struck the deck."

After I was alone on the boat, Yes, I lost a lot of blood before they got me to the hospital, but no fracture.

"No, I didn't have a drink before the accident, but took five straight after they sewed me up. Yes, I'm feeling fine now. Thanks for asking."

WINDSOR, Ont.—Jean Calder reported for duty as an operator with the Ontario lands department radio service at Galt three years ago. On the third two years, she said, she "fought continually" with the man in charge. The third year they spent "getting to know each other." Now they will be the first husband and wife team in the service.

The honeymoon of Mr. and Mrs. W. J. Hawkins began here. They plan to return to their northern Ontario post when on leave. In the meantime, Mrs. Hawkins will help her husband build a 150-watt transmitter for their own "Ham" station.

New B-36 bombers can carry 84,000 pounds of bombs. That's equal to the weight of about 26 automobiles.

When something is to be raised to the top of a pile, especially over shoulder height, it should first be shifted in such a manner that the waist level. Then the edge should be placed on a ledge or stand, while the position of the hand is shifted so that the object can be boosted further—Workmen's Compensation Board, Regina, Sask.

Bernice Reed,  
Wainwright, Alberta

Irma Prairie Chickens Girls Club has begun again with President Jean Larson, Vice-Pres. Lorna Archibald, Sec. Donna Coulter. Members are Irene Dootson, Charlotte Milne, Doreen Skinner, Marjory Coulter, Shirley Mae Saville.

Chauvin Darners Girls Club has also begun with Mrs. Fabian as Leader, President Katherine Pitman, Vice-Pres. Evelyn Pierce, Sec. Mary Nysetvold, Pres. Reporter Aileen Pitman. Members are Barbara McLeod, Betty Bayham, Anna Kist, Eva Farbridge, Jean Cargill, Margaret Maxine, Mary Ellen Boomhower, Maxine Saville.

Clandon Girls Club is being led by Mrs. Stanley. All three clubs are sewing clubs.

Mom always rubs a little grease on the bottom of a pan or more usually the coffee pot, when she has to put it over the fire to hurry up a meal. Then the black rubs off easily and the pan bottom is clean.

Something to remember. Shiny aluminum may be prettier to look at, but you'll do well to choose the dull-finished kind for pie pans, cookie sheets and baking tins. Pies, cakes and cookies will brown much better. Shine deflects the radiant heat.

For Brides and Wives. The sparkle on your third finger, left hand, has probably dimmed considerably, though the sparkle of your marriage hasn't a bit. Diamonds have a great affinity for anything oily and greasy, and soap film collects on the back of them, preventing light from shining through. Light from below as well as above, is what makes them twinkle. Bath your diamond monthly, in a solution of 1 part ammonia to 3 parts warm water, brushing with a tiny soft, clean lipstick or eyebrow brush: Rinse in clear water, then drain on tissue paper. Never never poke around it with a pin.

Hallowe'en Apples — Did you know that the best November eating apples are McIntosh, Snow Jonathan, Grimes' Golden, Delicious and Stayman, while the best Nov. cooking apples are Gravenstein, Wealthy, Ribston, King Baldwin, Stark and Wagner.

### Calgary Power Organizes Industrial Development and Research Division

### RAIN MAKING

Rain making in the United States is big business. Farmers this year spent over \$3 million hoping to get rain on some 350 million acres. Whether or not rain making by seeding clouds with silver iodide is economically worthwhile, remains to be proven, but a survey indicates that two of out of three farmers who had contracted for rain this year are satisfied that they have received their money's worth.

Officials of the U.S. weather bureau, while admitting that it is possible to increase moisture under proper conditions, remain skeptical as to its value. General Electric Scientist Vincent J. Schaefer has stated that, "I think we know enough that eventually we can do anything we want with the weather."

Aside from bringing rainfall, there seems to be a new angle to the business of cloud seeding. Dr. Bernard Vonnegut, another scientist with General Electric, says that the wise use of cloud seeding can achieve reduction of hail and its great damage to agriculture. A team of Oregon cloud seeders claim to have had three years of phenomenal results in knocking off hail thunderheads.

To Interview Young Men Interested in Aviation

ENLIST NOW. Take generous leave of absence to complete harvesting or wind up your affairs before proceeding to Manning Depot.

Make The R.C.A.F. Your Career

To men  
who like machines...

**RCAF** aircraft  
need your care!

Some men are especially good with their hands. They like to work with machines, machines or machinery. Such men need now how the R.C.A.F. — men with the skill and "know-how" to keep modern jet aircraft in perfect flying shape.

If you are mechanically-minded, you can serve Canada — in defence against aggression — as a skilled Aircraft Technician. The R.C.A.F. will give you the necessary trades training — at good rates of pay with opportunities for advancement in the modern field of aviation.

You must be between 17 and 40, and have Grade 8 education or better.

The RCAF will train you as a skilled  
AERO-ENGINE, ARMAMENT,  
AIRFRAME, INSTRUMENT,  
OR RADIO TECHNICIAN.

**HOW EGGS GROW**

At the University of Tennessee's Oak Ridge experiment station hens fed with mildly radioactive mash are laying radio-active eggs. This tracer technique, the university said, has helped its poultry scientists to follow the intimate workings of the hen's egg-making machinery. By skilled use of Geiger counters, they can follow the "hot" feed as it circulates inside the hen. They can measure it accurately as it forms into an egg.

A new-laid egg, say the scientists, contains material derived from feed that the hen ate as long as 40 days before. It takes eight to ten days to form a complete egg. Most of this time (about seven days) is spent in the making of the yolk. The shell is a quickly built container. Nearly 75 per cent of the mineral in it comes from feed that the hen ate the previous day.

**FOR SALE—2 male Collie pups, \$4 each. Apply W. Weaver, Kin-sella. 31p**

**Viking Items**

We would like to express our sincere gratitude to all the donors who responded to our appeal for blood donations on last Thursday. The travelling clinic was most agreeably surprised at the large number who attended. In all, 160 persons gave donations. This number is three times as large as at the previous visit of the donor panel. To the people of the Viking and Kinsella districts, to the NWU Ltd. camps, and to all the church groups and ladies who assisted during the day of the clinic, we wish to express our deepest thanks.

Home for the week-end from Camrose Lutheran College were Margaret Lefsrud, Glen Deering, Marilyn Peterson and Marilyn Leitch.

Mrs. J. M. Anderson has been visiting in Vancouver with her sister in that city.

Mrs. Fish of Edmonton who has been a guest at the home of her daughter, Mrs. M. Fitzmaurice, left for her home in Edmonton today.

**Edmonton Man Winner of Twelfth Car-A-Month Car****Newsy Items From Neighbor Papers**

From the Vermilion Standard—

A five month old girl died in a blazing farm home in the Minburn district on Monday while her mother, Mrs. J. Kratky was visiting a neighbor about a half mile distant. Unable to assist the baby, six other children rushed from the house and then were forced to watch their home destroyed by fire with their baby sister inside.

From the Westlock Witness—

Five summons to fight fire with in a 16 hour period were met by members of the Westlock Volunteer Fire Brigade Tuesday afternoon and night and early Wednesday. The brigade, under fire Chief Leo Pelletier, handled each fire with dispatch and efficiency, with a minimum loss to each fire victim.

(From The Viking News)

The first series of the Car A Month Club dances wound up last Friday evening at a dance held in the Community Hall with Joe Dubuc's orchestra from Vegreville furnishing the music. Dubuc is quite a favorite with the car a month club members.

At 1:45 p.m. Mayor Golka was called to the stage to draw a membership ticket from the revolving barrel containing the 5000 membership stubs, and a hush fell over the crowd as the stub was removed from the barrel and handed to the committee. The lucky holder was Mr. Frank M. Brown, of Edmonton, with stub No. 3988. Mr. Brown is a member of the Massay-Harris staff in the city, and by coincidence occupied the next desk to Mr. Brooks of the Massay-Harris Co., Edmonton who was the winner of the tenth car with the No. 3987.

An added attraction to the final draw in the first series came when twelve balloons hung from the ceiling were let loose each containing a one dollar bill. There was quite a scramble for the balloons and the lucky ones were Shirley Place, Mrs. L. Schuller, Mrs. H. Miskew, Alf Hill, Ivor Boraas, Ernest Merta, Gabriel Brisbarré, Mrs. Mollie Place and Jean Doyle, all of Viking; Roy Teske, Bruce; Jim Pond, Hardisty; and Joyce Arnold, Hardisty.

Herewith are the winners of the twelve cars in the first series:

J. A. Routh, Hay River, N.W.T.  
Dick Muthow, Tofield.  
Selmer Nelson, Strome.  
L. A. Herman, Sedgewick.  
Wm. Darby, Edmonton.  
Ross Maria Gosselin, Edmonton.  
Marjorie Stiles, Viking.  
A. R. Magee, Meadow Lake, Sask.  
E. D. Hannah, Edmonton.  
Donald H. Brooke, Edmonton.  
Benny C. Knudson, Viking.  
Frank M. Brown, Edmonton.

The first award in the second series will take place at a dance in the Community Hall on Friday, November 30, 1951, and continue for ten months. Got your membership?

**Farmers Win Sand And Gravel Rights**

The Court's decision on the "Sand and Gravel" case has just been delivered. In an unanimous decision, the five judges of the Appellate Division of the Supreme Court of Alberta, upheld the appeal of Messrs. Brown and Gaumont, which was backed by the Farmers' Union of Alberta, and they dismissed the original case brought by the Western Minerals Ltd. to obtain rights to the sand & gravel on the farms of these two parties.

Last year the Western Minerals Ltd. brought suit against these two Edmonton district farmers who had gravel pits on their land, claiming that the sand and gravel were with the mineral rights. The judge awarded the gravel to the oil company. This meant that the farmers in question were to lose their rights to the sand and gravel on their land and were to pay the oil company for all gravel sold from the pits in question since they were started.

The Provincial Government felt disturbed by the Court's decision that they enacted a law providing that in future all sand and gravel shall belong to the owner of the surface.

As the interests of many Alberta farmers may be involved, the FUA decided to appeal the case of Brown and Gaumont. A fund was opened and donations were received from Farmers' Union Locals, Municipal Districts and individual farmers throughout the Province. In the event of a further appeal being launched by the oil company, the funds will be needed towards the expense of fighting the farmers' case.

As the case stands now, the appeal is upheld and therefore sand and gravel is the property of the farmers in question. The Court also upheld the validity of the Provincial Government's recently enacted "Surface Rights Act."

Henry Young, President, Farmers' Union of Alberta.

**Voters 90% in Favor Of Hospital By-law**

(From The Viking News)

Voters in the Viking Municipal Hospital District went to the polls last Saturday and gave a magnificent majority in favor of the By-law to erect an addition to the present hospital. There was very little opposition to any of the polls. As a consequence a \$150,000.00 addition will be built and alterations and improvements made to the present building. The federal and provincial governments will make a cash grant of approximately \$40,000.00 towards the construction of the new wing which lowers the cost to the hospital district to \$10,000.00. Following is the official results by polls:

The Royal Couple inspects the Guard of Honor drawn up at the CNR depot. The Princess comments on their smart appearance to Lieut. F.C. Short, R.C.N., Edmonton, who was in command of the guard. Members of the Navy, Army, and Airforce reserve units made up the guard. Three members of the Vermilion unit and eight members of the Vegreville unit of the Loyal Edmonton Regiment were included in the army section of the guard.

## Alberta Motor Ass'n Is the Motorist's Best Friend

**IF YOU ARE A MEMBER DO NOT GIVE UP YOUR MEMBERSHIP.**

**IF YOU ARE NOT A MEMBER JOIN TODAY.**

**Your A.M.A. Membership Entitles You to:**

1. Insurance Protection. Your membership carries a \$1500.00 Personal Accident Insurance Policy including a \$25.00 weekly indemnity for disability incurred through an automobile accident which is good either riding or walking. Principal sum increases \$150.00 a year until a maximum of \$3,000.00 is reached. Your present policy expires with your membership.
2. Free Legal Advice arising out of any problems in connection with the member's automobile.
3. Yearly subscription to "The Voice of Motor-dom," a motor magazine of particular interest to all automobile owners.
4. Accident prevention activities and legislation, school safety and highway patrol activities.
5. Attractive emblem.
6. Automobile and road improvement legislative activities.
7. Court Service. The A.M.A. will upon request attend the police court in any city in which it has a branch office in answer to a summons issued to a member. Any fine is to be paid by the member.
8. We secure motor license plates for members and look after their driver's licenses, with other details.
9. Associate Membership. The wife, son or daughter of a member may secure the same insurance protection described above for a fee of \$2.50 per year.

Much work is planned for the years ahead of us. An improvement of conditions for the car owners of this province can be had by giving full support to the A.M.A. and the work it is doing.

## Three Canadians Are In Crew Seeking Lost Pirate Treasure

GOSPORT, England.—Three young Canadians will sail from here soon for the China Seas with a schooner expedition seeking the lost pirate treasure of Captain Kidd. The Canadians are Geoffrey Taylor, 22, of Montreal; John Fry, 20, of Montreal, and Ian Rogers, 21, of Toronto.

They have a tattered parchment map, which they believe will lead them to a tiny island where legend says the 17th Century pirate hid gold and gems worth \$4,200,000.

The 120-ton schooner La Morna is under charter for six months. She will weigh anchor and beat for the China Seas October 21.

The Canadians signed on with the crew organized by New Zealander George Shepherd. The rest of the crew include eight Englishmen, a German, an Italian and a Greek captain.

The treasure hunters are busy stowing underwater gear, water tanks, food and firearms aboard the La Morna.

Plans for the hunt began last January, when an antique-fancier, Mrs. Elizabeth Dick, discovered the chart by accident under a false bottom in the drawer of an old desk.

Legend says that Kidd managed to pass a single chart of his China Seas cache out through a jailer, where he was awaiting the hangman's doom.

He had been sent out by the British Navy to round up pirates, but went into the business himself. He was finally captured after a reign of terror on the seas, and hanged in London in 1701.

A smaller cache of his treasure was found some years ago on Long Island, N.Y.

Mrs. Dick will get the largest percentage of the booty if it is found. The rest will be split among the crew.

Taylor and Fry graduated at McGill University. Rogers has another year's study at Toronto University before graduating in economics. He will return to the university after the voyage.

Taylor, a civil engineering graduate, said he cancelled his passage home immediately and joined the crew as soon as I found out about it."

"I shall be helping with navigating and maintenance duties. Of course, we shall all have to take turns as deckhands."

Taylor put up \$2,000 and Rogers \$2,800 towards the total fund of \$14,000.

Rogers said the Kidd chart had been checked by the British Museum as possibly genuine 17th Century.

"It gives the latitude of the island but in those days they were not so good at longitude. So we shall sail along the latitude until we strike the island," he said.

The schooner's cabin boy?—Ian Rogers.

### German Girls Advised To Brush For Beauty

BERLIN.—East German women have been advised to brush their way to health.

The East Berlin newspaper National Zeitung urged them to "brush the entire body, beginning with the feet," with a stiff massage brush.

"You feel like a new person and are refreshed for your daily tasks," the newspaper said.

"Fingernails should be brushed with a soft rubber brush. Before doing you had better wash thoroughly."

"Teeth and gums are best brushed with a stiff, dry brush. Eyelashes and brows require a stiff small brush dipped in castor oil."

"Take a soft toothbrush and give your lips a thorough brushing. You do not need lipstick. Brushing helps to strengthen the muscles and give the mouth a new lift."

### A Canadian Preview Of Winter's Silhouettes

This wine and black checkerboard patterned suit, (left), with matching cape falling from slightly rounded shoulders will be ideal for those cold wintry days. Worn with it is a pillbox hat of black Persian lamb. The evening dress, (center), appropriately called "Bluebird", is of royal blue net, topped by an apron studded with jewels. To complete ensemble match-

ing gloves covered with jewels are worn with it. Wool frocks for winter are always popular with the younger crowd and this dress, (right), will prove to be no exception. Of red pleated sheer wool, it is banded at bottom with black.—Central Press Canadian.

## Girls Trained For Parachute Rescue Work Are Experts

JASPER, Alta.—The air force calls them ordinary Canadian girls, but they're a lot more than that. The girls who are members of the R.C.A.F. parachute rescue teams are trained to parachute into the wildest bush country without regard for life and limb in their mission of bringing rescue and relief to persons in difficulty in remote sections.

They can hop backwards down the steepest cliff faces, negotiate rivers by raft or canoe, handle an axe with the dexterity of any man, cross any glacier or wrest a living from the bush if necessary.

There are five of them originally, but one is temporarily out of action with injuries.

The girls, all volunteers, with two doctors and eight medical assistants are taking the special parachute rescue course at Edmonton and Jasper. It is the first time women have been

trained for this type of work in Canada.

The idea for the para-rescue course was conceived during the Second World War by the famous bush pilot W. R. (Wop) May, at that time associated with the R.C.A.F.

Objectives are three-fold:

1. To give the pupil a sound knowledge of the technique and application of bush lore, mountain climbing, travel afoot in rough terrain and survival practices.
2. To train pupils in the use and maintenance of life saving supplies dropped from aircraft.
3. To impart to the pupil a knowledge of the correct methods of parachute jumping under favorable or unfavorable conditions for rescue purposes.

Training is intense. It includes 40 hours of practical and classroom training, of which 65 hours are devoted to physical training. The key-note of the whole school is physical fitness. It results in 2½ hours of P.T. a day.

The women are expected to hold their own with the men — both in training and in the field. So far, they have compared well in training.

Do the girls like the work? Miss MacDonald, after completing a jump at Henry House field, near Jasper, said: "Oh, my goodness, that was wonderful."

Why do the girls go in for this kind of work? "It sounded like a good chance to see some of the country and to do things other people don't do."

Parachute jumping holds little terror for the students—male or female—and is considered the least dangerous part of the work. Cliff descents—or cliff repelling as it is called—causes the most anxiety. The cliff gives a sensation of height not experienced in a plane.

## Thousands Of Men Needed For Radar In North

OTTAWA.—Early-warning radar network spanning large sections of Canada's northland will require several thousand men, it will become known here.

Purpose of the network will be to warn of attacks on the mid-western United States and Canada.

In addition to the protected areas will be the National Capital area of Ottawa and the St. Lawrence Valley and Montreal.

It is a joint undertaking of Canada and the United States. Most of the radar posts will be manned by United States servicemen and a few by Canadians and some jointly. Where either power operates one completely, the other will have an observer attached to it.

The radar network has been on the top-secret level ever since it was conceived until the release of information by General Electric in the U.S., which has been on the classified list here.

Earlier, at the opening of the new session of Parliament, an order-in-council waiving in favor of the U.S. the Canadian regulation which requires all radio station licence holders and operators to be British subjects, was tabled by Prime Minister St. Laurent. It was to encourage U.S. servicemen to come to operate the radar stations on Canadian soil.

Most of the equipment for the radar network is being made or assembled in Canada through Defence Production Department officials. But the department has refused to say where or what quantities are being turned out.

### HISTORIC VOLUME

WINNIPEG.—A volume believed to be the oldest Ukrainian book in Canada was recently donated to the University of Manitoba. Entitled "Pomiany" and written in 1484, it contains obituaries of prominent European Slavs.

## Prevent Red Rough Hands

The homemaker who walls that her hands are doomed to roughness and redness because of the kind of work she does is really making excuses, whether she is right or wrong.

What she's truly saying is that she doesn't consider her hands sufficiently important to make an effort in behalf of their cleanliness.

Any housewife, busy with cooking, cleaning and child care, is justified in wanting to keep her hands in top condition, especially when it's suggested she adopt elaborate time-consuming routines.

Any woman, however, who's interested in retaining her essential femininity should be willing to devote a few minutes each day to overcoming her hand problem.

Face it frankly. Hands that are continually thrust into dish pans, scrub pails and laundry tubs are a prime cause of skin dryness. When the skin dries out, it becomes brittle.

One answer is prevention. Learn to use rubber gloves for your indoor tasks and canvas work gloves for your outdoor chores. You may feel a bit clumsy at first, but practice reduces awkwardness.

As an added measure, when you're engaged in particularly dirty tasks, make a practice of smoothing hand lotion on before you don your gloves. Or, if you find gloves unmanageable, use lotion as a substitute, smoothing on a thorough coating before you tackle the job.

Scrape your fingernails across a cake of slightly moistened soap to prevent imbedded grime beneath their tips.

If your hands suffer primarily from dish-washing, try this same trick. Apply a protective coating just before you begin and again when you finish. This will help counteract drying. A good choice is a creamy, lavender-blue-tinted lotion that dries quickly, leaving no oily residue.

It's a good idea to keep a bottle of hand lotion in a handy spot near your sink. Impulses to wash hand care are often cancelled out by the thought of walking all the way to your bedroom vanity.

## Women More Thorough In Learning To Drive

NEW YORK.—The automobile club of New York says women are more thorough than men in learning to drive, and that married women do better than single women.

The finding was based on studies in the club's driving courses.

Women as a rule are less easily discouraged than men in the first hours of learning to drive, said Martin Klein, the club's director of traffic engineering and safety.

He said women show marked steadiness, good reaction timing and a resistance to bewilderment caused by the glare of oncoming headlights.

## High School Girls Show Desk On Wheels With Radio, Snack-Bar

TORONTO.—A desk on wheels complete with shelves for snack-bar and radio—that's what the modern teen-ager may find in her room one of these days.

The piece was among items at a recent showing of furniture in a Toronto department store.

The desk on wheels was the main piece of furniture in a room designed for the high school miss.

The exhibit stressed that colors in rooms should suit the personality of their occupants. For the girl who's blonde, there was a room with red maple furniture and evergreen walls.

A sophisticated background of Chinese modern furniture with touches of blue and yellow in drapes and walls was the setting for the dark-haired girl.

## New Penicillin Drug Disclosed In Treating Lung Diseases

PHILADELPHIA.—The effective use of a new form of penicillin against chronic lung conditions, chronic bronchitis and lung abscess, was disclosed at the second annual meeting of the Institute of the Graduate School of Medicine, University of Pennsylvania.

Dr. Harrison F. Flippin, associate professor of medicine at the school, told 300 physicians the new drug, known as neomycin, gets through tissue in the lung and kills infection in diseases where other types of antibiotic did not.

He described the drug as a mixture of penicillin and iodine.

### TAKING NO CHANCES ON BREAKING RECORD

IRIDE, Japan.—On the streets of Iride, no smoking.

For those who must light up, there are seven public smoking rooms along the main street.

Iride, a village of 3,200, hasn't had a fire in 50 years and the townsmen are determined that no carelessly tossed cigarette is going to threaten that record.

## OUR COMPLETE SHORT STORY

## TOMORROW, KATE

Johnny, Her Boy . . . Why Had She Doubted? :: By Constance Edgerton

KATE ENRIGHT sat on the ranch that house years ago when she came here. She had come to the open door, then dropped to an old chair to dream of her new work, teaching the school near her.

Twenty-seven years' in one little school, and tomorrow was her last day. She would wear a set smile, then her neighbors for the kindness and help she gave the community she was ready to return to.

There was to be a program and picnic. It would never do to let anybody know she was sunk, felt ousted, because one young mother who insisted: "Young teachers for young children."

She knew, from bits of talk, that Elinor Gordon was particularly anxious to get another teacher.

Kate had rested Elinor's husband, Johnny Gordon, found him asleep in the house the night she came. He was in a big chair, and when the lamplight shone on his hair his golden hair was his little face was

golden, and his little face was golden.

The morning she got his story. Five years old, an orphan. He had been living around with the ranchers, but came here, playing it was his home.

Kate had taken the school "sight unseen" because it had a house next door. She hadn't bargained there'd be an adorable little boy to keep her company, and he did make life together. In time she bought the house and surrounding acreage. When Johnny finished the grades he enrolled in a boarding school in town for high school. Vacations he worked around home. In no time at all he was studying at university.

While he was a student there the Elinor family came into the valley. Their daughter, Elinor, was at the university, set on becoming a nursery school teacher. She and Johnny met,

fell in love, were married the week after he graduated, and Elinor moved to the ranch.

Elinor kept at Johnny, saying Kate was too far out of step to handle children, and if Johnny doubted this, he should visit every family in the school district, ask what they thought of Kate, and when he found they didn't consider her the best teacher in the county, would he be satisfied?

Johnny started out to canvas the district. He couldn't stand out again. Elinor urged him. He had carved his initials when Kate wasn't looking, the flowers on the sills, the long benches, maps, blackboard, and the silver birch in the yard. He had fallen from that tree and broken an arm when he was nine.

Elinor had said: "Kate, you're not progressive?"

"Progressive?" She had attended summer schools, kept up with young teachers, but she couldn't shed discipline.

But now she awaited the dropping of the sword. She would apply for the school at Link Prairie, drive back and forth. Even though Elinor said: "You've taught long enough. Retire." She had to keep on.

Families came from remote corners of the district, to say goodbye . . . to wish me well.

The commencement of better than she expected. The women set tables and lay out the luscious food they had prepared. Kate stayed a few moments in the school to try to still her wildly beating heart and force a smile to her cold lips. She went out, stood on the steps, and Johnny came for her. She thought: Oh, Johnny, how could you do this?

Johnny silenced them and said: "On behalf of the school board and the district, Miss Enright . . . It was coming, the dismissal. He had never called her Miss Enright—'I am asking you to teach next year as many more years—'" Cries of: "Miss Kate! Our Miss Kate!" stopped him.

"Say yes, Kate." She had no words so she nodded, and the cheers made her dizzy. The women crowded around, telling how Johnny came to every home asking them to sign a paper to keep Miss Kate.

What's her boy . . . Way had she doubted?

## Weekly Sew-Thrifty

SEW THE ONE-YARD SKIRT! Yes, this requires only one yard of 54-inch fabric for any size. Sizes: waist 24, 26, 28, 30. Look for the smart button trim and front flaps; the back-closing which makes this the best-fitting skirt you ever had! Look at the diagram above, two big pieces; three little ones! Fashion, that's fast and easy sewing in Pattern 4899.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions. Price, 35¢ in caine (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept., Winnipeg Newspaper Union, 69 Front Street W., Toronto.

—Stamps courtesy Imperial Stamp Shop, Toronto. This stamp issued on October 26 to commemorate visit of Princess Elizabeth and Prince Philip to Canada.

## : Western Briefs :

## Gravel Kamsack-Canora Road

KAMSACK, Sask.—Easier driving between Kamsack and Canora will come to pass shortly in spite of weather conditions. Dr. G. McEachern has been awarded a contract calling for 600 tons of gravel per mile, to be placed on No. 5 highway between here and Canora.

## To Name Street

EDMONTON, Alta.—Edmonton street will be renamed in commemoration of the visit of Princess Elizabeth and Prince Philip. This will be a departure from usual Edmonton street names. A few carry names, but most streets and avenues are numbered in a grid system.

## Will Be Helpful

MEDICINE HAT, Alta.—A baby-sitter and nursing service is provided here for parents attending morning services at a local church. Baby carriages may be wheeled right into the nursery from one church entrance.

## Banded Chicken Shot

BRANDON, Man.—A prairie chicken, bearing band No. 2374 of the Game branch, Winnipeg, was included in the bag of a Brandon carabiners recently while hunting south of Brandon. The bird was banded in 1948. The band was not discovered until Stewart Pickell was picking the bird after its return home.

## Inspecting Flocks

GRANDON, Man.—A staff of thirty men will soon be on the road inspecting and banding poultry flocks throughout Manitoba. D. C. Foster, provincial poultryman. A few inspectors, all of whom are hired on a temporary basis, have already made a start, but delayed harvesting has prevented the work from getting under way. Mr. Foster stated. Inspection should be completed before the end of the year.

## Hens Had Long Service

CALGARY.—George A. Morrison, a man who has written 32,000 words in the past 38 years, has retired from the staff of official court reporters at the Calgary court house. During his long term of service he has been the silent but busy recorder of every word spoken during more than a thousand trials and has filled about 800 large note books with his neat shorthand notes.

## Collapse Of Egg Market Unlikely

WINNIPEG.—The general level of egg prices in 1952 will be "somewhat lower than in 1951," but there will be no collapse of the market, W. J. Landreth of Winnipeg, chairman of the Canadian Poultry Council said.

He was commenting on a report from British Columbia predicting "chaotic conditions" and imminent collapse in the egg industry.

The immediate likelihood is that egg prices will actually increase somewhat, Mr. Landreth said. "We do not expect a general lowering of prices until the new crop of layers gets into full production some time around November 15."

## SCARLET FEVER IN B.C.

VANCOUVER, B.C.—The worst outbreak of scarlet fever since 1944 has hit Vancouver. Health officers said 752 cases have been reported so far this year, compared to the 1944 total of 975. There were 190 cases last year.

## How to Use Plenty Of Inferior Feed . . .

The prospects are for an abundant livestock feed supply in Canada although of inferior quality, following poor weather conditions at harvest-time. The same is true in the United States where more hay per hay-eating animal unit will be available than ever before. Of feed concentrates, specialists in Washington report a supply 6 to 10 per cent. less per animal than during the last three years, but the cost is more than the average before the War.

The problem will be to make the most efficient use of the feed on hand, whatever the quality. Sound wheat and coarse grains make excellent feed. But what of unsound grains, smutted grains or rusted roughages? Do they constitute a danger to livestock? What is their nutritive value? Do they constitute a danger to livestock? What is their nutritive value?

According to a release issued by the Experimental Station at Swift Current, Sask., smutted grains or

rusted roughages are not injurious to livestock. Ergot grain, on the other hand, is harmful and should not be fed if the ergot bodies make up one-tenth of one per cent. of the grain.

Sprouted grain is a good feed, especially when dry, due to its protein. Its feeding value is lower than that of similar unsprouted grain, it is necessary to increase the amount fed to obtain good results.

Considerable roughage will be fed in inferior quality. Hay that has been in the field during a series of rains totalling two inches or more may lose up to 25 per cent. of its dry matter and 10 per cent. of its protein. Smutty or dusty roughage will be lost. Vitamin A will also be lost. If this type of hay must be fed, it will be necessary to feed some form of protein supplement if good results are to be obtained. Hay that has heated slightly in the stack will not necessarily be harmful. Again, however, the heat will reduce the protein and additional amounts will be necessary to give the same results as sound hay. Extremely musty or dusty roughage should be avoided.

Frozen or immature flax should not be fed as there is a danger of prussic acid poisoning. This poison can be detected by chemical analysis.

## Mrs. Harry Conover Compares Blue Bonnet — Loves Its Taste!

Many model housewives have taken this tip from Mrs. Harry Conover, wife of the manager of the Blue Bonnet plant in St. Paul. Like the noted beauty and TV personality, you'll love the delicate, sun-sweet flavor. Come to your local supermarket and try Blue Bonnet's nutritionally balanced margarine. You'll appreciate Blue Bonnet's nutrition. And you'll welcome its real economy. So buy Blue Bonnet's margarine. It's the new Nutritional Economy-o-e! Use it in cooking, on vegetables, as a delicious spread.

Teachers also must have genuine respect for parents. "The teacher must realize that the child's home and parents powerfully affect his social and emotional development in school and also his ability to read, to spell or compute."

## CAFES HARD HIT

WINNIPEG.—A Vancouver restaurant official said that Canadian restaurants have suffered "a very high mortality rate" during the last three years because of rising costs and operational losses.

REGINA: — Fifty-two forest fires burned in northern Saskatchewan this year, lowest number in at least 20 years. Fred Warburton, resources department fire control chief, reported.

In a bureau of publications release, Mr. Warburton said a total area of 14,000 acres was burned, with timber losses estimated at \$41,000. Fire fighting costs amounted to \$16,000.

Mr. Warburton said fast action in fire control, often made possible through use of the smoke-jumper's unit, had helped keep fire losses to a minimum. The weather also had been favorable with high water levels and an unusually rainy season combining to keep the fire hazard down.

The immediate likelihood is that egg prices will actually increase somewhat, Mr. Landreth said. "We do not expect a general lowering of prices until the new crop of layers gets into full production some time around November 15."

SCARLET FEVER IN B.C.

VANCOUVER, B.C.—The worst outbreak of scarlet fever since 1944 has hit Vancouver. Health officers said 752 cases have been reported so far this year, compared to the 1944 total of 975. There were 190 cases last year.

WOMAN PRINCIPAL

REGINA.—For the first time in 20 years a woman—Miss Alexandra E. Graham—has been appointed principal of a Regina public school.

PERSONAL REMINDER

WADDESDALE, Sask.—On Ingulard, 88, can tell you the day of the week for any date in 1885 at a glance. He saved his calendar of that year that he brought when he travelled as a young man from Norway.
